Subject Index of Volume 16

Absorption isotherms

- determination of micropore volume of activated carbon from, of light hydrocarbons, 583

Acetic acid

- mechanistic study of ketonization of; catalytic activity of 1:1:1 Zn, Cr and Fe mixed oxide, 17

ADP crystals

- hardness anisotropy of, 125

Alloy(s)

- concentrated binary niobium, containing Mo, Pd, Re, Cr, W, Zr, Ti, V and Hf; fabricability and hardness of, 587
- Fe₈₀-B₂₀ amorphous; electrochemical investigation on, 569
- FeSi; influence of (110) surface deviation from [001] direction on dependence of domain widths upon crystal thickness in, 525

Aluminium cations

- pitting corrosion behaviour and mechanism on carbon steel induced by, 31

Amorphous substances

- amorphous Ge_xSe_{1-x} films; relaxation processes with conductivity as physical parameter in, 79
- Fe₈₀-B₂₀ amorphous alloy; electrochemical investigation on, 569

Anisotropy

- hardness, of ADP crystals, 125

Antimony compounds

- growth of antimony seleno iodide single crystals from vapour, 197
- growth of SbI₃ single crystals from vapour by temperature oscillation method, 189
- growth of SbSI and BiSI from vapour by iodine transport, 181

Argon dilution

- effect of; Raman scattering studies in glow discharge deposited a-Si:H films, 433

Austenite

- hot-deformed and austenitized; transformation to pearlite from, 451

Barium compounds

- crystal structure and phase transition of BaTb₂Mn₂O₇, 89
- luminescence of Ce³⁺ and Tb³⁺ in M₃(PO₄)₂ (M = Sr, Ba), 63

Benzene

- binary gaseous diffusion coefficients; chlorobenzene, 1,2-dichlorobenzene, 1,3-dichlorobenzene, 1,1,1-trichloroethane, tetrachloroethene, 1,4-dioxane and octamethylcyclotetrasiloxane with air at 1 atm and 283 K to 343 K, 397

Bismuth compounds

- growth of SbSI and BiSI from vapour by iodine transport, 181
- structural model for new modulated phases within Bi₂O₃-TeO₂ system, 133

Boron

- electrochemical investigation on Fe₈₀-B₂₀ amorphous alloy, 569

Capacitors

- mixed-valence copper oxides as electrodes for, 553

Carbide

- ordering of carbon atoms in titanium monocarbide, 475

Carbon

- activated; determination of micropore volume of, from absorption isotherms of light hydrocarbons, 583

Carbon steel

- pitting corrosion behaviour and mechanism on, induced by Al cations, 31

Catalytic activity

- of 1:1:1 Zn, Cr and Fe mixed oxide; mechanistic study of ketonization of acetic acid, 17

Catalytic study

- of ZnCrFeO₄ spinel; synthesis and structural characterization, 459

Cathodic polarization

- hydrogen embrittlement of high strength steel wires under, 501

- Ceramic materials
glassy and glass; luminescence in, 301
- Cerium
luminescence of Ce^{3+} and Tb^{3+} in $\text{M}_3(\text{PO}_4)_2$ ($\text{M} = \text{Sr}, \text{Ba}$), 63
- Chlorine compounds
binary gaseous diffusion coefficients;
chlorobenzene, 1,2-dichlorobenzene, 1,3-dichlorobenzene, 1,1,1-trichloroethane, tetrachloroethene, 1,4-dioxane and octamethylcyclotetrasiloxane with air at 1 atm and 283 K to 343 K, 397
- Chromium
catalytic activity of 1:1:1 Zn, Cr and Fe mixed oxide; mechanistic study of ketonization of acetic acid, 17
- Chromium compounds
synthesis, structural characterization and catalytic study of ZnCrFeO_4 spinel, 459
- Cobalt
Co(II) and Ni(II) as exchange ions; characterization of fibrous thorium phosphate containing, 411
- Conductivity
relaxation processes with, as physical parameter in amorphous $\text{Ge}_x\text{Se}_{1-x}$ films, 79
- Contact angle
interpretation of, in marble/organic liquid film-water system, 489
- Copper compounds
effect of excess In on electrical properties of polycrystalline thin films of CuInSe_2 , 535
mixed-valence copper oxides as electrodes for capacitors, 553
photoelectrochemical studies on single crystal $\text{CuInS}_2/\text{I}_n^-$ system, 145
- Crystal(s)
ADP; hardness anisotropy of, 125
antimony seleno iodide single; growth of, from vapour, 197
crystal structure and phase transition of $\text{BaTb}_2\text{Mn}_2\text{O}_7$, 89
crystal thickness in FeSi alloy; influence of (110) surface deviation from [001] direction on dependence of domain widths upon, 525
growth of SbSI and BiSI from vapour by iodine transport, 181
polycrystalline thin films of CuInSe_2 ; effect of excess In on electrical properties of, 535
- SbI_3 single; growth of, from vapour by temperature oscillation method, 189
single, $\text{CuInS}_2/\text{I}_n^-$ system; photoelectrochemical studies on, 145
- Cutting fluid additives
new-type water-soluble, from polymeric surface active agents, 575
- Diffusion coefficients
binary gaseous; chlorobenzene, 1,2-dichlorobenzene, 1,3-dichlorobenzene, 1,1,1-trichloroethane, tetrachloroethene, 1,4-dioxane and octamethylcyclotetrasiloxane with air at 1 atm and 283 K to 343 K, 397
- Electrical properties
effect of excess In on, of polycrystalline thin films of CuInSe_2 , 535
- Electrocatalysis
and surface chemistry; interplay of, at oxide/aqueous solution interfaces, 157
- Electrochemical investigation
on $\text{Fe}_{80}-\text{B}_{20}$ amorphous alloy, 569
- Electrodes
mixed-valence copper oxides as, for capacitors, 553
- Electroluminescent thin films
materials for, 349
- Epitaxy
liquid phase; InP substrate protection and cleaning in, 45
- Epoxy resin
-rubber dual-phase system; structures and properties of, 443
- Excluded volume(s)
and effective molecular volume; relationship between, for some simple liquids, 467
temperature dependence of, of some simple liquids from high density P-V-T data, 53
- Fibrous thorium phosphate
characterization of, containing Co(II) and Ni(II) as exchange ions, 411
- Film(s)
amorphous $\text{Ge}_x\text{Se}_{1-x}$; relaxation processes with conductivity as physical parameter in, 79
electroluminescent thin; materials for, 349
flash evaporated zinc phosphide; growth morphology and optical properties of, 561

- glow discharge deposited a-Si:H films;
Raman scattering studies in; effect of argon dilution, 433
- marble/organic liquid film-water system;
interpretation of contact angle in, 489
- polycrystalline thin, of CuInSe_2 ; effect of excess In on electrical properties of, 535
- thin, preparation by spray pyrolysis for solar cells, 385
- Fluorescent lighting
new era in; phosphors based on rare-earths, 283
- Germanium compounds
relaxation processes with conductivity as physical parameter in amorphous $\text{Ge}_x\text{Se}_{1-x}$ films, 79
- Glass
luminescence in glassy and glass ceramic materials, 301
- Glow discharge
deposited a-Si:H films; Raman scattering studies in; effect of argon dilution, 433
- High density P-V-T data
temperature dependence of excluded volumes of some simple liquids from, 53
- High temperature oxidation
of niobium superficially coated by laser treatment, 423
- Hydrocarbons
light; determination of micropore volume of activated carbon from absorption isotherms of, 583
- Hydrogen
hydrogen embrittlement of high strength steel wires under cathodic polarization, 501
- Raman scattering studies in glow discharge deposited a-Si:H films; effect of argon dilution, 433
- structure of hydrogen bis(dihydrogenodiphosphonate) triallium: $\text{Ti}_3\text{H}(\text{H}_2\text{CH}_2\text{P}_2\text{O}_6)_2$, 175
- Impurities
transition metal, in compound semiconductors; experimental situation, 373
- Indium compounds
effect of excess In on electrical properties of polycrystalline thin films of CuInSe_2 , 535
- InP substrate protection and cleaning in liquid phase epitaxy, 45
- photoelectrochemical studies on single crystal $\text{CuInS}_2/\text{I}_n^-$ system, 145
- Interfaces
oxide/aqueous solution; interplay of surface chemistry and electrocatalysis, 157
- Iodine
photoelectrochemical studies on single crystal $\text{CuInS}_2/\text{I}_n^-$ system, 145
- Iodine compounds
growth of antimony seleno iodide single crystals from vapour, 197
- growth of SbI_3 single crystals from vapour by temperature oscillation method, 189
- growth of SbSI and BiSI from vapour by iodine transport, 181
- Iron
electrochemical investigation on $\text{Fe}_{80}\text{-B}_{20}$ amorphous alloy, 569
- Iron compounds
catalytic activity of 1:1:1 Zn, Cr and Fe mixed oxide; mechanistic study of ketonization of acetic acid, 17
- hydrogen embrittlement of high strength steel wires under cathodic polarization, 501
- influence of (110) surface deviation from [001] direction on dependence of domain widths upon crystal thickness in FeSi alloy, 525
- pitting corrosion behaviour and mechanism on carbon steel induced by Al cations, 31
- synthesis, structural characterization and catalytic study of ZnCrFeO_4 spinel, 459
- transformation to pearlite from hot-deformed and austenitized austenite, 451
- Ketonization
of acetic acid; mechanistic study of; catalytic activity of 1:1:1 Zn, Cr and Fe mixed oxide, 17
- Laser treatment
high temperature oxidation of niobium superficially coated by, 423
- Luminescence
of Ce^{3+} and Tb^{3+} in $\text{M}_3(\text{PO}_4)_2$ ($\text{M} = \text{Sr}, \text{Ba}$), 63
- in glassy and glass ceramic materials, 301
- new luminescent materials; physics of, 201
- materials for electroluminescent thin films, 349
- rare-earth ion; quenching of, in molecular and non-molecular solids, 237

- Manganese compounds**
crystal structure and phase transition of $\text{BaTb}_2\text{Mn}_2\text{O}_7$, 89
- Marble**
/organic liquid film-water system; interpretation of contact angle in, 489
- Mechanical properties**
and rheological properties; influence of processing conditions on, of polycarbonate/polypropylene blends, 115
- Micropore volume**
determination of, of activated carbon from absorption isotherms of light hydrocarbons, 583
- Modulated phases**
new; structural model for, within Bi_2O_3 - TeO_2 system, 133
- Molecular volume**
effective, and excluded volume; relationship between, for some simple liquids, 467
- Morphology**
growth, and optical properties of flash evaporated zinc phosphide films, 561
- Nickel**
 Ni(II) and Co(II) as exchange ions; characterization of fibrous thorium phosphate containing, 411
- Niobium**
fabricability and hardness of concentrated binary niobium alloys containing Mo, Pd, Re, Cr, W, Zr, Ti, V and Hf, 587
high temperature oxidation of niobium superficially coated by laser treatment, 423
- Optical properties**
and growth morphology of flash evaporated zinc phosphide films, 561
- Oxidation**
high temperature, of niobium superficially coated by laser treatment, 423
- Oxide(s)**
/aqueous solution interfaces; interplay of surface chemistry and electrocatalysis, 157
catalytic activity of 1:1:1 Zn, Cr and Fe mixed oxide; mechanistic study of ketonization of acetic acid, 17
mixed-valence copper oxides as electrodes for capacitors, 553
- Pearlite**
transformation to, from hot-deformed and austenitized austenite, 451
- Phase transition**
and crystal structure of $\text{BaTb}_2\text{Mn}_2\text{O}_7$, 89
- Phosphors**
based on rare-earths; new era in fluorescent lighting, 283
new X-ray, 253
- Phosphorus compounds**
characterization of fibrous thorium phosphate containing Co(II) and Ni(II) as exchange ions, 411
growth morphology and optical properties of flash evaporated zinc phosphide films, 561
hardness anisotropy of ADP crystals, 125
 InP substrate protection and cleaning in liquid phase epitaxy, 45
luminescence of Ce^{3+} and Tb^{3+} in $\text{M}_3(\text{PO}_4)_2$ ($\text{M} = \text{Sr}, \text{Ba}$), 63
structure of hydrogeno bis (dihydrogenodiphosphonate) trithallium: $\text{Ti}_3\text{H}(\text{H}_2\text{CH}_2\text{P}_2\text{O}_6)_2$, 175
- Photoelectrochemical studies**
on single crystal $\text{CuInS}_2/\text{I}_n^-$ system, 145
- Pitting corrosion behaviour**
and mechanism on carbon steel induced by Al cations, 31
- Polarization**
cathodic; hydrogen embrittlement of high strength steel wires under, 501
- Polycarbonate/polypropylene blends**
influence of processing conditions on rheological and mechanical properties of, 115
- Polymers**
crosslinked, and topological gelation criterion; graph representation for, 511
new-type water-soluble cutting fluid additives from polymeric surface active agents, 575
- Poly(methyl methacrylate)**
/poly(ethylene oxide) blends in solution, 1, 101
- Pyrolysis**
spray; thin film preparation by, for solar cells, 385
- Quenching**
of rare-earth ion luminescence in molecular and non-molecular solids, 237
- Raman scattering**
studies in glow discharge deposited a-Si:H films; effect of argon dilution, 433

Rare-earths

- quenching of rare-earth ion luminescence in molecular and non-molecular solids, 237
- phosphors based on; new era in fluorescent lighting, 283

Rheological properties

- and mechanical properties; influence of processing conditions on, of polycarbonate/polypropylene blends, 115

Rubber

- epoxy resin dual-phase system; structures and properties of, 443

Selenium compounds

- effect of excess In on electrical properties of polycrystalline thin films of CuInSe_2 , 535
- growth of antimony seleno iodide single crystals from vapour, 197
- relaxation processes with conductivity as physical parameter in amorphous $\text{Ge}_x\text{Se}_{1-x}$ films, 79

Semiconductors

- compound; transition metal impurities in; experimental situation, 373

Silicon

- Raman scattering studies in glow discharge deposited a-Si:H films; effect of argon dilution, 433

Silicon compounds

- binary gaseous diffusion coefficients; chlorobenzene, 1,2-dichlorobenzene, 1,3-dichlorobenzene, 1,1,1-trichloroethane, tetrachloroethene, 1,4-dioxane and octamethylcyclotetrasiloxane with air at 1 atm and 283 K to 343 K, 397
- influence of (110) surface deviation from [001] direction on dependence of domain widths upon crystal thickness in FeSi alloy, 525

Solar cells

- thin film preparation by spray pyrolysis for, 385

Spinel

- ZnCrFeO_4 ; synthesis, structural characterization and catalytic study of, 459

Steel

- carbon; pitting corrosion behaviour and mechanism on, induced by Al cations, 31
- high strength wires; hydrogen embrittlement of, under cathodic polarization, 501
- transformation to pearlite from hot-deformed and austenitized austenite, 451

Strontium compounds

- luminescence of Ce^{3+} and Tb^{3+} in $\text{M}_3(\text{PO}_4)_2$ ($\text{M} = \text{Sr}, \text{Ba}$), 63

Sulphur compounds

- growth of SbSI and BiSI from vapour by iodine transport, 181
- photoelectrochemical studies on single crystal $\text{CuInS}_2/\text{I}_3^-$ system, 145
- preparation and characterization of ZrO_2 and SO_4^{2-} promoted ZrO_2 , 67

Surface active agents

- polymeric; new-type water-soluble cutting fluid additives from, 575

Surface chemistry

- and electrocatalysis; interplay of, at oxide/aqueous solution interfaces, 157

Surface deviation

- influence of (110), from [001] direction on dependence of domain widths upon crystal thickness in FeSi alloy, 525

Synthesis

- of ZnCrFeO_4 spinel; structural characterization and catalytic study, 459

Tellurium compounds

- structural model for new modulated phases within $\text{Bi}_2\text{O}_3\text{-TeO}_2$ system, 133

Temperature dependence

- of excluded volumes of some simple liquids from high density P-V-T data, 53

Temperature oscillation method

- growth of SbI₃ single crystals from vapour by, 189

Terbium

- luminescence of Ce^{3+} and Tb^{3+} in $\text{M}_3(\text{PO}_4)_2$ ($\text{M} = \text{Sr}, \text{Ba}$), 63

Terbium compounds

- crystal structure and phase transition of $\text{BaTb}_2\text{Mn}_2\text{O}_7$, 89

Thallium compounds

- structure of hydrogeno bis (dihydrogenodiphosphonate) trithallium: $\text{Tl}_3\text{H}(\text{H}_2\text{CH}_2\text{P}_2\text{O}_6)_2$, 175

Thorium compounds

- characterization of fibrous thorium phosphate containing Co(II) and Ni(II) as exchange ions, 411

Titanium compounds

- ordering of carbon atoms in titanium monocarbide, 475

Topological gelation criterion

- and crosslinked polymers; graph representation for, 511

Transition metal impurities

- in compound semiconductors; experimental situation, 373

Water

interpretation of contact angle in marble/-
organic liquid film-water system, 489

new-type water-soluble cutting fluid addi-
tives from polymeric surface active
agents, 575

X-ray phosphors

new, 253

Zinc

catalytic activity of 1:1:1 Zn, Cr and Fe

mixed oxide; mechanistic study of
ketonization of acetic acid, 17

Zinc compounds

growth morphology and optical properties
of flash evaporated zinc phosphide films,
561

synthesis, structural characterization and
catalytic study of ZnCrFeO_4 spinel,
459

Zirconium compounds

preparation and characterization of ZrO_2
and SO_4^{2-} -promoted ZrO_2 , 67
